FY08 Report

4-H CHILDCARE/BABYSITTING

Thirty six Kentucky counties reported 1368 youth completing 6 or more hours of child care/ babysitting training improving their knowledge and skills related to ages and stages of child development, appropriate guidance and discipline techniques as well as workforce and entrepreneurial skills.

Over ½ of the youth completing the training have already implemented new safety practices when caring for children as a result of participating in the training.

In addition to learning skills directly related to babysitting and childcare, 686 youth have used entrepreneurial skills developed through this training to develop a business plan, advertise their services or keep better records related to their child care/babysitting enterprise.

4-H Child Care/Babysitting 36 Counties Reported Participating
