

## *Is It Point or Nonpoint?*

Mark the items below that can be sources of nonpoint water pollution.

- A lawn that has been fertilized.
- A wastewater discharge pipe.
- The construction site for a shopping center.
- The parking lot at the local mall.
- A leaking underground storage tank.
- A farm feedlot for livestock.
- A golf course that has been sprayed with weed killer.
- A household wastewater straight pipe.
- A logging site.
- A hillside that has no grass or trees growing on it.
